## CLEANING INSTRUCTIONS:

Advanced Flooring Concepts LVT Products are engineered to withstand scratches and dents from everyday living. Our mission is simple: to make good floors better!! If you follow the steps below your floor is going to look good as new for years to come.

Good Practices	Bad Practices
Sweep the floor regularly with a soft bristle broom to remove loose dirt	Pouring Bleach on the floor and mopping vs applying bleach to a rag and spot cleaning dirty areas
Use a PH Neutral Cleaner	The Use of a Steam Cleaner
Wipe the floor with a Microfiber cloth or damp mop	
Clean spills as quickly as possible and rinse with water	Drag, push or pull the furniture across the floor
Lift & Carry Furniture	
Use Protective Pads	Use a Vacuum with a rotating beater bar
Use Walk-off mats for extra protection	Over Saturate the floor with too much cleaner

### CLEANING & MAINTENANCE

After installation - Use a dry cloth or vacuum cleaner for cleaning. When water or any cleaning liquid is used, please squeeze out all water for cleaning

#### Harsh Cleaning Agents:

When you have tough stains to remove with you can use bleach, denatured alcohol, urethane cleaning solution, or acetone, designed to remove stubborn areas. We recommend spot cleaning with harsh cleaning agents, and not pouring on the floor and mopping.

Never use scouring agents, polish, or wax as they may dull or distort the finish.
